

FASPLINT HALFBACK®

Compact Vacuum Splint

SMR Protocol Based
Immobilization

Full Spinal Splinting

Spinal Splinting in a Compact, Comfortable and Cost-Effective Vacuum Splint

The FASPLINT HALFBACK® compact vacuum splint stabilizes each patient in the position most comfortable for them, making it ideal for back injuries and geriatric care. The FASPLINT HALFBACK is a smaller, more compact design which is budget friendly and reduces storage requirements.

Provides full spinal splinting from the head to the hips. The FASPLINT HALFBACK mattress is designed to alleviate pressure point pain and vastly increases patient comfort during transport on various patient handling devices like the CombiCarrierII®, a flat backboard or a scoop stretcher. Polystyrene beads insulate the patient to help prevent hypothermia.

INNOVATIVE DESIGN

COMPACT SPINAL SPLINTING

Provides spinal splinting from the head to the hips and can be used with a variety of patient handling devices. Stabilizes the entire patient as one unit eliminating the potential for unnecessary movement.

VERSATILE

SUPERIOR COMFORT

Significantly reduces or eliminates the pressure point tenderness and pain often seen in patients secured to a backboard. Dampens vibrations from irregular road conditions and helps emergency personnel stabilize a patient in a position of comfort during transport to the hospital.

RUGGED CONSTRUCTION

DESIGNED TO LAST

Made from high quality, extremely durable materials that are easy-to-clean and withstand years of use.

REUSABLE EQUIPMENT

VALUE AND PERFORMANCE

Using supple vinyl on the front and a heavier grade vinyl on the backside for extended durability, this splint is designed to be both budget-friendly and reusable.

X-RAY COMPATIBLE

X-RAY COMPATIBLE

X-ray compatible.
