Ambu® Man School

Key features

- Ambu hygienic system to prevent cross contamination
- Compact and portable training manikin
- Easy training of chest compressions
- Closed torso
- Easy placement of AED pads
- 10 manikins for optimal class training

AmbuMan School

AmbuMan School is a training manikin which offers human appearance. It is dedicated to the training of all procedures for basic life support resuscitation.

The manikin can be used for realistic training of external chest compressions and the placement of AED pads in order to get comfortable with AEDs.

The unique hygienic system prevents cross contamination when demonstrating and training the principals of ventilation through mouth and nose.

The AmbuMan School is intended to be used for education of pupils in schools under the supervision of an instructor/teacher.

Conforms to Guidelines
The AmbuMan School allows instructors to perform CPR training following the latest CPR guidelines.

Compact and portable
Lightweight and compact, the AmbuMan School is easy to transport and set up.

Easy AED training
Due to the closed shaped torso, defibrillation pads can be placed and simulated AED training can be performed.
