

Are You Pediatric Ready?

DBG Mini - Actual Size

#1 method for pediatric weight estimation during emergencies when patients true weight is unavailable.
Kaufmann, et al., (2012)

The Mini

Get the weight - Get it fast - Get it right

Improved Accuracy

Incorporates 2014 CDC NHANES data sets vs. others still using 2007
No folds or creases that skew measurements

Quicker Weights

Retractable design & smooth operation means no more unfolding large LBTs
Quickly accessible with compact design that fits easily into pocket

Completely Compatible

Industry standard weight-color zones to use with your existing dosing aides

Reduces Errors

Eliminates "wrong-end" measurements that account for nearly 5% of dosing errors

Safer Dosing

Weights listed in kg for proper dosing and reporting

Cost Effective

Agency/institution pricing at \$10/ea
