SAVING LIVES in SECONDS™

## T-POD

### Pelvic Stabilization Device

**Clinical tests prove the T-POD to be the quickest, most effective and user-preferred device for treating pelvic trauma.**

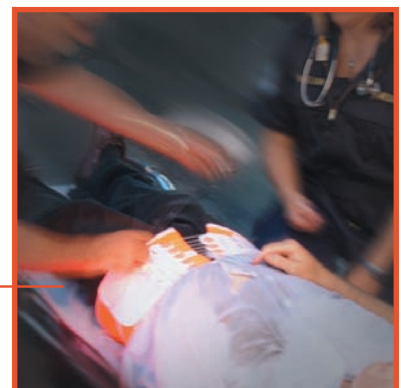

NSN 6515-01-526-2788

*"If you want to reduce the volume in the pelvis, I have never seen nor used anything that works as well as the T-POD. The best thing is that it is the most well designed and efficient device that is exceptionally simple to use."*

- Commander Peter Rhee MD, MPH, FACS, DMCC Director, Naval Trauma Training Center, Associate Professor of Surgery, Molecular Cellular Biology, LA/USC Medical Center

There are thousands of traumatic pelvic injuries each year in the United States.

A high percentage of motor vehicle accident fatalities are the result of bleed-out due to pelvic fractures.

# T-POD

## Pelvic Stabilization Device

### Superior Features & Performance

The tremendous, proven performance and efficacy of the T-POD results from its simultaneous Circumferential Compression and Mechanical Advantage features.

#### Circumferential Compression

T-POD is the only product providing simultaneous, complete, circumferential compression--resulting in the safest and most effective stabilization of the pelvic region.

**T-POD is the safest, most effective and most efficient means of providing compression to the pelvic region.**

#### Mechanical Advantage

**Pull the handle--feel the power!**

The unique, Mechanical Advantage Pulley System of the T-POD provides for quick, universal compression of the pelvic region with a simple and quick pulling of the tab.

#### High-Visibility, Efficient and Effective Package

T-POD is available in high-visibility orange or military OD color and comes in a compact, quick-opening package that comes complete with easy-to-follow instructions.
