

Thomas EMS Aeromed Pack

One of our best selling packs, the Aeromed pack is an extremely space efficient and durable pack.

The **Aeromed Pack** is specifically designed for initial care of the critically ill or injured patient. The Aeromed Pack is most commonly used for ambulance, search and rescue, high rise rescue, helicopter or as a personal medical kit. In addition, the Aeromed Pack is an excellent specialty kit for trauma, pediatric, neonatal, burn, obstetrical, cardiac or respiratory patients.

The Aeromed Pack Features:

- 4 interior color coded vinyl window pockets
- 3 medium exterior pockets
- 2 large exterior pockets
- 1 large hidden pocket
- 3 small vinyl window interior base pockets

The placement and closure of these pockets is specially designed to reduce the likelihood of equipment loss. The color coding and clear vinyl front pockets allow rapid location access of equipment and supplies as well as quick re-stocking. The D rings on the back of the pack allow shoulder straps to be easily attached. The ladder frame of the pack can also serve as a splint when needed.

Dimensions: 11" x 12" x 5"

*Does not include backpack straps. Backpack straps sold separately.
