

# THE DISASTER RESPONSE/BLEEDING CONTROL BAG

The QuadMed Disaster Response/Bleeding Control bag is a fully customizable mass casualty response deployment system. The interior of the bag folds out and contains twelve individual kits that can be dispersed to multiple areas and personnel. Two large side pockets and one large front pocket hold extra supplies.

The bag can be configured into four standard configurations based on supplies. Each interior kit contains the same items so responders are familiar with the kits contents. **See configurations below.**

Additional configurations can be customized to your exact needs. For more info contact your sales rep.

**All bags come stocked with 50 nitrile gloves, 12 Cyalume Light Sticks and P.A.W.S wipes. EACH BAG CONTAINS 12 KITS IN THE BELOW AVAILABLE CONFIGURATIONS.**
